

frequently asked questions

h1000 Device Serial Numbers

“What are the UPD file names and serial number identifications for h1000 devices?”

The serial numbers printed on the side of h1000 devices are in fact an abbreviated version. The full serial number can be found by using the Flash Download Program and a Field Programmer Device. To view the full serial number, the Tick Box in the Flash Download Program must be cleared.

The first two digits enable the Flash Download Program to identify what the unit is as follows:

Device	UPD File Name	Serial Number Identification
Digital Display	DIGIDISP.UPD	02 XXXXXXXXXXXXXXX
3FD Display	3FD.UPD	05 XXXXXXXXXXXXXXX
Compass Sensor	COMPASS.UPD	61 XXXXXXXXXXXXXXX
Pilot Display	PLTDISP.UPD	04 XXXXXXXXXXXXXXX
